Irrigated Lands A Sure Thing!

The Government work is under full headway toward putting water on two hundred thousand acres of land adjacent to the Burlington road at an average cost of \$25.00 per acre. It is possible to-day to secure homestead lands along these great ditches, in advance of the water. You can also buy from private concerns very fine irrigated lands, under a full and permanent water supply, at prices ranging from \$25.00 to \$40.00 per acre.

The history of western irrigated lands shows that their value has increased over 100 per cent in the past few years. There are acres of irrigated lands in the west that cannot be bought to-day for \$300.00 an acre.

It Will Pay You to investigate the irrigated lands proposition in the North Platte Valley, the Big Horn Basin, the Billings (Mont.) District or Eastern Colorado.

Ask me for literature descriptive of any of these localities.
It will be a pleasure to give you further details.

Two mules and a horse were also burned, together with a quantity of corn and oats. Orville, the 12-year-old son, was stunned by the bolt, but soon recovered. —Maitland Herald.

—An unusually heavy wind storm visited the northern part of our county, on Friday evening last, April 27th, about five o'clock. The wind was in that section along the old Cummins Porter place and the William Andes neighborhood. The wind would rise high and then drop to the earth tearing up trees and hedges that stood in its path and this seemed to be the extent of destructiveness. Some hail fell also.

—Fire destroyed the dwelling house on the farm of R. C. Glenn, near Mound City, Monday forenoon, April 23d, and the occupants of the house, Mr. and Mrs. John Wm. Walker, lost almost all of their household goods. The fire originated, it is evident, from sparks from the chimney falling on the roof, and the strong wind fanned them into a blaze. The loss falls heavily upon Mr. Walker, who had no insurance. The house was insured. Mr. Glenn has already commenced the erection of a small house, intending to enlarge it later. —Mound City News.

In the Buying We Do Our Work!

In the great clothing centers, alert and watchful, with cash in hand, we buy by clever manipulations, extending this store's reputation for underselling.

Vast quantities of quality clothes for men and boys, closed out the past few days at tremendous concessions in price, crowd our sales floors. As a store buys, so it should sell. When we are able to own our goods below the market price, our patrons invariably share in the saving. That's our policy, fixed, well defined, a rule from which we never deviate.
